File Differencing and Updating Engines

ABSTRACT

5   A file differencing and updating system is provided that includes a file differencing component and a file updating component. The file differencing component, or file differencing engine, generates a difference file in a first processor-based or computer system from an original or old version and a new version of an electronic file. The file updating component, or file updating engine, generates a copy of the new file on

10   a second processor-based or computer system using the difference file and the hosted copy of the original file.
